

Project MariEMS final conference in Istanbul

The project MariEMS (Maritime Energy Management Training Strategic Partnership) closing conference took place in Bahcesehir University, Istanbul on 22 March 2018. The attendees were distinguished maritime professionals from the region including BAU's academic staff and students.

After the welcome speech of Dr. Basak Akdemir of Bahcesehir University, Prof. Reza Ziarati of C4FF made the keynote presentation titled "Efficient Ship". The Chief Executive Director of EMSA (European Maritime Safety Agency) Mr. Markku Mylly was invited as a speaker, and the title of his speech was "Energy Efficiency and Sustainability of Shipping – EMSA Support". The President of Turkish Maritime Education Foundation Dr. Sualp Urkmez was another renowned speaker and his presentation was "TUDEV transformation into Piri Reis University – Role of EU projects". The presentations were followed by Captain Zakirul Bhuiyan of Southampton Solent University who highlighted the key achievements and final outcomes at the end of 30 months long project to the audience. This EU project is expected to help to reduce the energy usage on-board ships, thereby reducing emissions and pollution. The project is also helping IMO and the EU in achieving their stated emission targets through better training for the management of energy on board vessels.
